It is also a good idea to remove the blades from the blades arms at this point. For example, if you have a fan with an open screen, the process is simple: unscrew the bulb and screw the second. All the user has to do is unscrew the screws that hold the ballon in place, remove it gently and throw it again once they finish the bulb replacement. The key detail to remember is to turn off the energy when the bulbs are replaced. In addition, it is good idea to turn off all wall switches of the room, or even of the house. Then, it's time to unscrew the arms of the roof blade with the Phillips screwdriver.
